¹ Environmental data includes all fully consolidated RTL Group companies. Consumption data was broken down by use area at each location for the first time, and consumption figures for non-Group companies were excluded from 2018 data for the first time. The reported information is based on primary data collected by RTL Group companies representing 86 per cent of the Group's employees. The data for the other 14 per cent of employees were estimated using calculated average factors for 2017 and 2018, respectively.

² Corrected data mainly for excluding outsourced activities as well as a corrected heat consumption figure for RTL Hungary. Related data for total heat consumption, total energy consumption, energy intensity, total scope 1 emissions, total scope 2 emissions, total scope 3 emissions were corrected for 2017.

³ In 2018, RTL Hungary replaced and renewed its broadcasting studio and IT equipment, which led to an increase in hazardous waste.
